

WATERTIGER™

Under the counter drinking water systems The “Gold Medal” choice – Ultrafiltration

Watertiger’s under the counter Ultrafiltration system provides high-quality water for your residential kitchen needs – drinking, cooking, washing vegetables, or making coffee/tea, without the higher cost or waste water concerns of Reverse Osmosis. This compact unit comes complete with all the installation hardware required for a quick, painless install.

UF systems are ideally suited to commercial beverage applications. They are a quality alternative to other commercial filters, combining precise filtration and value to protect vital equipment and keep operating expenses low. Perfect for coffee makers, ice makers, juice or beverage machines.

The colour coded, ¼ turn quick-change cartridges make maintenance a snap – you can change the filters yourself in minutes.

Furthermore, Ultrafiltration won’t remove minerals or change the alkalinity of your water.

Simply refreshing

How UF works

Watertiger's UF system utilizes a three stage filtration process:

- 1) Dirt and particle removal
- 2) Chlorine removal
- 3) 0.01 micron Ultrafiltration

This leaves you with clean, clear, safe water to keep your family and customers satisfied, and your dollars in your wallet!

Comparison of size:

1 micron = 1 millionth of a meter (0.00003937 inch)

Width of human hair = 75 microns

Common sediment filters = 5 microns

Smallest bacteria = 0.22 microns

Smallest virus = 0.01 microns

Notes and recommendations:

- 1) Do not use with water that is microbiologically unsafe or unknown quality without adequate disinfection before the system.
- 2) For cold water only.
- 3) Test data was collected in laboratory conditions. Actual performance and service life will vary depending on local water conditions and pressures.
- 4) Filters must be changed after winterization or long periods of storage.
- 5) Presence of phosphates or high turbidity, organic loads in water supply will decrease service life.

Model	Filtration Type	Flow rate	Service Life	Working Pressure	Inlet/Outlet	Dimensions
V360312UF-00	Ultrafiltration	1.9 LPM	One year	30 – 80 psi	¼"	2.5"x12"
